

Programmes Arduino Minitel

Librairies

[Libraries Minitel1B_Soft](#)

1.1 Prise mécanique

La prise péri-informatique est du type DIN 5 broches femelle sur laquelle sont disponibles les signaux suivants :

- **broche 1** : réception des données par le terminal (signal Rx) ;
- **broche 2** : masse ;
- **broche 3** : émission de données par le terminal (signal Tx) ;
- **broche 4** : périphérique en transmission (signal PT) ;
- **broche 5** : sortie alimentation disponible pour les périphériques. Cette fonction n'est pas disponible sur les versions dont l'identification porte les références Cu2 à Cu4 incluses.

Prise femelle vue de face

- prise Arduino D2(RX) sur 3 minitel (TX)
- prise Arduino D3(TX) sur 1 minitel (RX)
- prise Arduino GND sur 2 minitel (Masse)

Minitel Demo

Minitel-Esp32 Test Laison serie entre minitel et terminal arduino ou esp32

[ESP32_Minitel-Demo000.ino](#)

```
// OK apres test

void setup() {
  Serial.begin(115200); // port debug
  Serial2.begin(1200, SERIAL_7E1); // port minitel
}
```

```
void loop() {  
  // redirection debug -> minitel  
  while (Serial.available() > 0) {  
    Serial2.write(Serial.read());  
  }  
  // redirection minitel -> debug  
  while (Serial2.available() > 0) {  
    Serial.write(Serial2.read());  
  }  
}
```

Minitel-ESP32 Test differant affichage
